Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1 and 4-11 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Moran.

3. Moran discloses the invention as claimed where: **20** is a foldable tape section with equally spaced indicators **22** that contrast with the color of the tape; **23** is a base section that is attachable to a fish-holding device; **11** is a weighted object at the opposite end of the tape; the tape may be plastic or the like, which inherently includes cloth; and the tape is inherently removable from the base since it can be cut, torn or otherwise removed. The method of claim 11 will inherently be performed when the device is used to measure fish.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 2 and 3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Moran in view of Klein.

6. Moran discloses the invention substantially as claimed. However, Moran does not disclose a base with a slot as claimed. Klein discloses how a base **A** may be attached to a tape for the purpose of allowing objects to be passed through the slot when taking a measurement. Furthermore, the pathway to the slot may be obstructed or not (FIGS 2 and 4, respectively). Therefore, it would have been obvious at the time the invention was made for one of ordinary skill in the art to use a base as taught by Klein in combination with the tape of Moran for the purpose of allowing an object to be passed through the base when taking a measurement.

7. Claim 12 is rejected under 35 U.S.C. 103(a) as being unpatentable over Moran in view of Ciolli et al..

8. Moran discloses the invention substantially as claimed. However, Moran does not disclose a step of taking a picture during the measurement of an object. Ciolli et al. discloses how a camera may be used when measuring an object to provide photographic evidence that the measurement is correct. Therefore, it would have been obvious at the time the invention was made for one of ordinary skill in the art to use a camera as taught by Ciolli et al. in combination with the tape of Moran for the purpose of verifying a measurement with photographic evidence.

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
